

Basic Training Program (BO2)

Cord Blood Collection – Best Practices for Clinical and Research Applications

Cost: AED 6,499
(VAT is not included in the above price)

Duration	Based on university requirements
Format	Lecture & Observership + Simulated Lab Workshop (Non-clinical)
Target Group	Undergraduate students in Nursing, Midwifery, Allied Health students
Location	FSG Lab – Meeting Room FSG Molecular Laboratory Eppendorf Customer Experience Center
Certificate	Certificate of Attendance (Not valid for licensing)

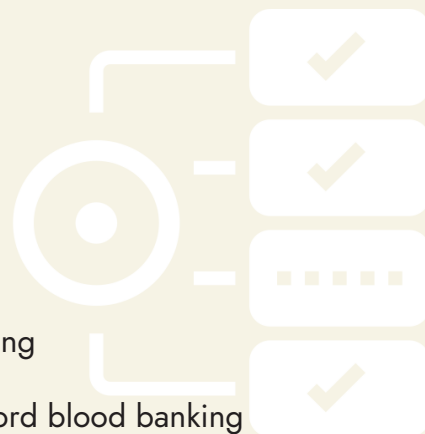

Program Overview

This observership-based program offers a comprehensive introduction to the principles and best practices of cord blood collection in both clinical and research contexts. Participants gain exposure to supervised workflows within a GMP-certified facility. Designed specifically for students and non-licensed professionals, the program covers regulatory, ethical, and operational aspects of cord blood collection through lectures and real-time observership sessions.

Program Objectives

By the end of the training, participants will:

-  Understand the biological and clinical importance of cord blood
-  Observe the protocols for safe and effective cord blood collection
-  Gain exposure to lab practices for documentation and ethical handling
-  Learn about the regulatory, safety, and transport considerations in cord blood banking
-  Participate in evaluation and reflection on best practices

Modules & Topics Covered

- ✓ **Module 1:** Introduction to Cord Blood – Lecture & Observership
- ✓ **Module 2:** Safe and Effective Cord Blood Collection – Lecture & Observership
- ✓ **Module 3:** Storage, Transportation & Regulatory Compliance
- ✓ **Module 4:** Documentation, Quality Control & Ethical Considerations

Why Train with Us?

- Delivered in partnership with Eppendorf, a global leader in life science lab technologies
- Conducted in a GMP-certified facility
- Access to advanced equipment
- Real lab setting + simulated experience = best of both worlds
- Personalized supervision by licensed technologists and research trainers
- Structured to meet university-accredited elective training requirements

Application & Registration Workflow

1

Submit Training Inquiry

Via www.fsg-lab.com or email

2

Receive Eligibility Confirmation

With slot availability and instructions

3

Prepare & Submit Full Application

· Undergraduate Students:

- University endorsement letter (stamped/signed)
- Passport copy or Emirates ID (front & back)
- Passport-size photo (white background)
- Student ID

4

Application Review & Confirmation

FSG will confirm acceptance and finalize schedule

5

Receive Invoice & Settle Fee

Via bank transfer or approved method

6

Receive Pre-Training Instructions

Including schedule, dress code, and lab rules

7

Begin Training

With original passport/EID and student ID

8

Complete Training & Receive Certificate

Upon successful attendance and conduct

Terms & Conditions

Once the training slot is confirmed and payment is invoiced, the training fee becomes non-refundable. Participants are expected to attend all sessions on time and comply with the program's conduct, safety, and dress code requirements. Any absence or failure to meet minimum attendance may result in non-issuance of the certificate. FSG reserves the right to reschedule training sessions or change speakers or locations due to operational needs, with prior notice to participants.
